SHORT ANSWER

1. Differentiate between impersonal and interpersonal communication.

ANS:
Impersonal—one-way communication, usually in written form, used to give basic information. There is seldom opportunity to clarify or question. Interpersonal—two-way communication for sharing information. Goal is to build relationships through the communication process. There is interaction between the parties and feedback from the receiver.

2. Identify three types of effective listening and give examples of each.

ANS:
Active—give speaker your full attention, display body language that shows you are listening, ask for feedback as to what you think you are hearing. Critical—listen for evidence that supports and challenges what you are hearing. Empathic—avoid being judgmental, acknowledge what is said and be patient.

PTS: 1 DIF: Difficulty: Moderate REF: p. 33-35
KEY: Bloom’s: Application

3. Provide a few examples of nonverbal messages and describe how they affect the communication process.

ANS:
Research suggests that the nonverbal messages we convey through facial expressions, tone, gestures, appearance, personal space, etc have more impact than our verbal messages. If our verbal and nonverbal messages match, we give the impression that we can be trusted and that what we are saying in believable. When the messages aren’t consistent, the listener is more likely to believe the nonverbals.

4. Discuss how communication in the business world has changed with social media and mobile devices.

ANS:
You can always be available to talk to your customers, clients or co-workers. You have less privacy as messages can be viewed by devices issued by your employer. Also they can be forwarded on to another person or many people. Observing good communication etiquette is more important than ever as you need to change your style based on whom you are talking with.

Formal: Horizontally (between people on the same level of authority) and vertically (information travels up and down the levels of authority). Informal: The grapevine (information passes unofficially in many directions through a web-like pathway).

PTS: 1 DIF: Difficulty: Easy REF: p. 36-37
7. Identify the advantages and disadvantages of using e-mail in organizational communication.

ANS:
a. Advantages: can be efficient and accurate, cost-effective, accommodates shy individuals, crosses hierarchical barriers, minimal counterproductive interruptions, convenient, enhanced customer service, and reduced communication filters.

b. Disadvantages: limits ability to clarify vague or confusing wording, requires time to plan/compose accurate message, uncertainty of when and if the message has been received, requires good writing skills, lacks nonverbal cues that the sender and receiver can interpret.
