19) A physical asset, such as furniture or a car, is called a(n) _____.

- A) tangible asset
- B) financial asset
- C) investment
- D) liability
- E) none of the above

Answer: A

Diff: 2

Topic: Assets

AACSB: 3. Analytical skills

20) Explain what goes on a balance sheet and its uses.

Answer: A personal balance sheet consists of three parts: assets, liabilities, and net worth. Assets include the value of monetary assets, investments, retirement plans, housing, automobiles, personal property, and "other" assets. Liabilities consist of current bills, credit card debt, housing, automobile loans, and "other" debt. Your net worth consists of the part of your assets that are clear and free of debt. It is found by subtracting liabilities from assets. The balance sheet is a useful tool to see your current financial position. It is a good barometer to gauge your financial net worth over time by comparing quarters or years. It also supplies the numbers needed for developing financial ratios to determine your financial health against common standards.

19) Suppose that Doug's only assets are an automobile worth \$10,000 and a checking account with a \$5,000 balance. His only liabilities are a student loan balance of \$12,000 and a balance of \$9,000 on his car loan. What is his net worth?

- A) \$21,000
- B) \$15,000
- C) \$6,000
- D) Doug is currently insolvent.
- E) None of the above statements are correct.

Answer: D

Diff: 2

Topic: Net Worth

AACSB: 3. Analytical skills

20) Describe an income statement and its functions.

Answer: An income statement consists of three parts: income, expenses, and surplus funds. Income includes income from all sources from all parties contributing to the household. Typical expense items consist of housing, food, clothing and personal care, contributions, recreation, medical expenses, insurance, and transportation. Surplus funds tell if you have any money left over at the end of the month or if you spent more than you earned. An income statement shows an itemized list of expenditures and allows you to isolate areas where you are over spending. It is a good planning tool for budgets and income tax preparation.

AACSB: 3. Analytical skills

21) Does how you use debt effect your net worth?

Answer: Yes, it depends on what you use your credit for. If you use credit to buy tangible assets like home furnishings, cars and real estate, then you will eventually have equity in these assets as you pay down your debt. If you use debt for daily living expenses, travel and entertainment then you have nothing of value to offset your debt or liabilities.

AACSB: 3. Analytical skills

23) What questions do financial ratios help answer?

Answer: By calculating your current ratio you can answer the question, "Do I have adequate liquidity to meet emergencies?" Debt ratios answer, "Do I have the ability to meet my debt obligations?" "Am I saving as much as I think I am?" is answered by the savings ratio.

Diff: 2

Topic: Ratios

AACSB: 7. Reflective thinking skills

24) How do you calculate the current ratio, debt ratio, and savings ratio?

Answer: Current ratio is calculated by dividing the total of current assets by the total of current liabilities. A ratio of 1.0 will get you by, but a ratio of 2.0 or more is preferred. The debt ratio is determined by dividing total debt or liabilities by total assets. The savings ratio is found by dividing the income available for savings and investment by income available for living expenses.

Diff: 1

Topic: Ratios

AACSB: 3. Analytical skills

25) Explain the relationship between the debt ratio and insolvency?

Answer: The debt ratio shows the relationship between your assets or how much you own and your liabilities or how much you owe. Your assets minus your liabilities leaves your net worth. If your debt ratio is a fraction below 1.0, then your assets are larger than your debt leaving you solvent with positive net worth. If your debt ratio is larger than 1.0, then your debt is greater than your assets leaving you insolvent with negative net worth.

Diff: 3

Topic: Ratios

AACSB: 3. Analytical skills

26) A financial ratio by itself is of little value. To what can you compare your financial ratios to make them very valuable financial planning tools?

Answer: Financial ratios can be compared to historical ratios, projected or budgeted ratios and expert advice or industry averages. If I knew my savings ratio for 2009 was 6 percent and my savings ratio for 2012 is 8 percent, then I know I have made an improvement in freeing up cash for savings and investment. If I budgeted my savings ratio for 2012 to be 10 percent and it is currently running at 8 percent, then I know I am not on track to meet my budgeted goals for the year. I can then analyze my income and expenditures to see why I am not on track to meet my goals or possibly my goals were not realistic based on current conditions. If my savings ratio is currently 8 percent and the experts say that the ideal or average savings ratio should be 15 percent, then I can measure how well I'm doing compared to these benchmarks and adjust accordingly.

10) Explain the steps in developing a cash budget.

Answer: First, determine your anticipated income by referring to last year's adjusted income. Next, estimate your level of taxes to determine after-tax income available for living expenses. Add fixed and variable expense estimates together to determine your level of spending. Last, subtract living expenditures from expected take-home pay to calculate income available for savings and investment.

11) Tell how to implement the "envelope" budgeting system.

Answer: For those new to budgeting or those with small amounts of self-discipline, the envelope system is useful. Use a separate envelope for each major monthly expense, including one for miscellaneous, and label each with the expense name. Allocate the proper amount of money for each envelope expenditure from the appropriate paycheck/source of income. Use the money in each envelope only for its intended use and you should have enough to go around. As soon as possible, incorporate an envelope for savings and emergencies.

- 4) What are the four choices in managing your financial affairs?

Answer: The most simple approach is to manage your finances yourself. A second choice is to jointly plan your finances with a professional planner. A third choice is to let a professional planner put your entire plan together for you. If you still want to develop your own plan you might want a professional planner to validate what you have done rather than do the planning.

- 5) Prepare a list of questions to ask a prospective financial planner you are considering.

Answer:

1. How long have you been a financial planner?
2. What are your credentials and professional designations?
3. Do you actively participate in continuing education to keep up with the times?
4. How do you keep up with the latest financial changes?
5. Will you provide us with references?
6. Will you let me see a copy of a financial plan you did for someone else in similar circumstances, of course with the name removed to preserve confidentiality?
7. Who will work with you and will the work be done by a junior staffer or a computer program?
8. How many companies do you represent?
9. How do you get paid — fee, commission, or a combination? What will it be, how often are you paid, and how will your fee be calculated?
10. Will you provide a written estimate of the services I expect and the cost of those services?

6) List the benefits a professional financial planner can offer.

Answer: A financial planner has the knowledge and skills to teach you the financial axioms. The pro will be able to help you prepare balance sheets, income statements, budgets, financial ratios, as well as savings, investments, and retirement plans that are realistic from an objective point of view. A financial planner can save you much time and costly mistakes. He or she may suggest a computer software program to meet your individual needs as well as give tax advice. You want to develop a win-win situation with this person.

7) The experts say that, stereotypically, a fee only financial planner is a better option than one who earns commissions on what they sell you. Why is this sometimes true?

Answer: Because of the Agency relationship and self-interested behavior, a commission earning Financial Planner may be more interested in the commissions they will earn verses what is best for your personal needs. There is the potential for them to recommend financial products that pay higher commissions to them and these products may not be best suited for your individual needs or there may be less expensive options available. A fee only planner has no incentive since their fees are not contingent on your financial decisions. They know they must do a good job for you or you will not continue with them or refer new business to them.
